Stain Removal

FABER POULTICE

Thickening powder for Faber stain removers

FABER POULTICE is a powder to be used in combination with some Faber stain removers in order to thicken the consistency allowing more extensive applications over time and also on vertical surfaces. Its composition is inert to all the components of Faber stain removers in which it can be used. A stain remover combined with **FABER POULTICE** will have a much denser consistency, allowing longer contact times with the stain, thus increasing the effectiveness of the entire stain removal operation.

BENEFITS

- Powder formula
- Compatible with all Faber stain removers
- It does not alter the stain removing power of the products with which it is combined

USES

Refer to the technical data sheet of the stain remover you intend to thicken using Faber Poultice

COVERAGE

300-400 grams for each liter of stain remover in case of horizontal application
400-500 grams for each liter of stain remover in case of vertical application

APPLICATION EQUIPMENT

Spatula

APPLICATION STEPS

Surface preparation

Refer to the technical data sheet of the stain remover you are adding with **FABER POULTICE**.

Solution preparation

Pour the stain remover to be added into a sufficiently large bucket or container and then gradually add the identified quantity of **FABER POULTICE**. Mix using a spatula or other tool suitable for the purpose. Continue mixing, until an even, fluid and lump-free mixture is achieved.

Application

Before applying the product is necessary to take a preliminary test on an unexposed area or unused piece of material to check the product's suitability.

Refer to the technical data sheet of the stain remover you are adding with **FABER POULTICE**.

Resume Surface Use

Refer to the technical data sheet of the stain remover you are adding with **FABER POULTICE**.

INSTRUCTIONS AND GUIDELINES

- Do not mix with other chemical compounds other than FABER stain removers
- Do not apply the product on wet or excessively humid supports
- Do not apply the product on overheated supports
- Do not apply the product with imminent danger of rain or frost, in the presence of fog.

PROFESSIONAL LINE

INSTRUCTIONS AND GUIDELINES

- During the application of the product the affected surface must not be exposed directly to the sun's rays
- Apply the product with an ambient temperature between +5 and +40°C degrees
- In the case of application on recently laid or grouted surfaces, wait for the grout to fully cure.
- In order to obtain a visually and aesthetically uniform result, especially in the case of absorbent surfaces, it is suggested to apply the stain remover by treating delimited sectors larger than the single stained portion, such as an entire tile or an entire room, to be established in based on the size and spread of the stain
- Nearby surfaces that are not intended to be treated must be adequately protected
- Before proceeding with the application of the product on the entire surface, it is preferable to carry out a preliminary test on a portion of material that is not visible or not laid, to evaluate its suitability for the intended use.

EQUIPMENT CLEANING

At the end of the application, the equipment used can be washed using water

PHYSICAL-TECHNICAL DATA

Formula	Powder
Color	Beige
Odor	Unscented
Specific gravity a 20°C	350 ± 10 g/l

STORAGE

Keep the container tightly closed and store in a cool, dry place.

SHELF LIFE

24 months in the original, sealed packaging, stored in a cool, dry place.

PACKAGING

1,2 kg buckets – 4 units per box

SAFETY

When applying the product, always use suitable personal protective equipment and follow the product safety data sheet instructions with care.

Rev. 3.0 – 17/10/2022

This technical data sheet supersedes all previous versions. Always refer to the latest version of the data sheet, available on www.fabersurfacecare.com site. Faber Chimica reserves the right to update and/or modify the data and information contained in the datasheet.

The information in this data sheet is based on our wide experience in technical and operational research. In any case, you should always make a preliminary test to verify the suitability of the product for the intended use and the type of material on which it will be applied. The information and the suggestions can't be construed as a commitment or result in our responsibility as the conditions and method of use of the product cannot be controlled by us.
